

# Magnet Forensics CTF

**Magnet Forensics User Summit 2023 (ONLINE) CTF After Action Writeup**

**By Matthew Plascencia**

## CIPHER (Unanswered: 2)

### salad are for THE chumps

Q: Pa'z H-Tl, Thypv

A: After reading the question once and then once again, pick out the word "SALAD" and notice that the Caesar Cipher could be assumed from that word, since it's a salad. When you brute-force the Caesar cipher, you get the following correct answer: **It's-A-Me, Mario!**

### The earth's rotation really makes my day.

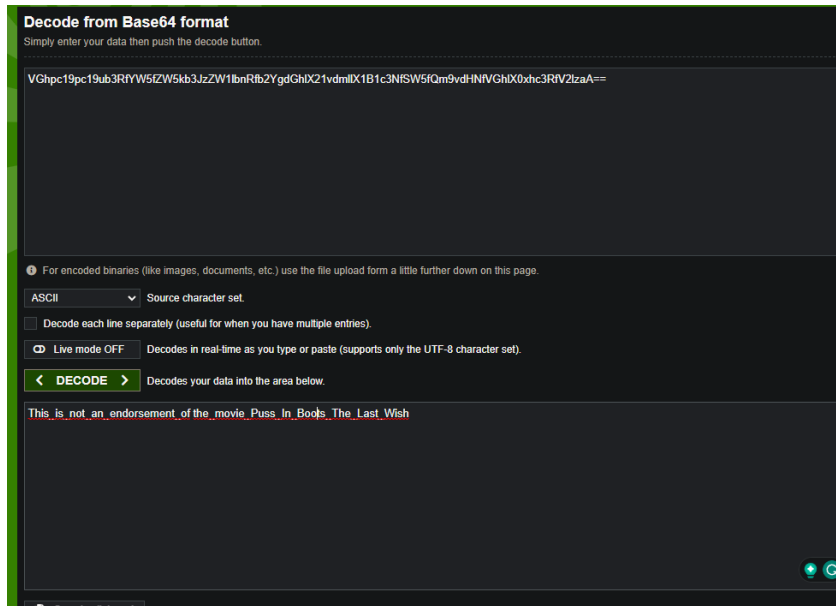

Q: (9E0:D0E960A2DDH@C5

This clue is a cue for a brute-force rotation cipher. If you put it into an online tool, you will get the following: **Wh\_t\_is\_the\_password**

### I like the trailer for this movie. Can't wait to see it in theaters!

A: Put this image into a Kali VM or hex editor and find that it has the following flag at the end. Decode frn base64 first.

*This is not an endorsement of the movie Puss In Boots The Last Wish*

## SomeTimes its nicE to just stop workinG and searchH the Internet for gooD mEmes.

See the file *challenge.jpg*

A: Reading the question for capital letters gives us a hint for using steghide. When we use steghide on Kali Linux, we find the following flag: **eleven\_is\_more\_than\_ten**

The command we use is ***“steghide extract -sf challenge.jpg -xf hi.txt”***

## As long as more than Zer0 people enjoy these challanges I'd be happy Width that!

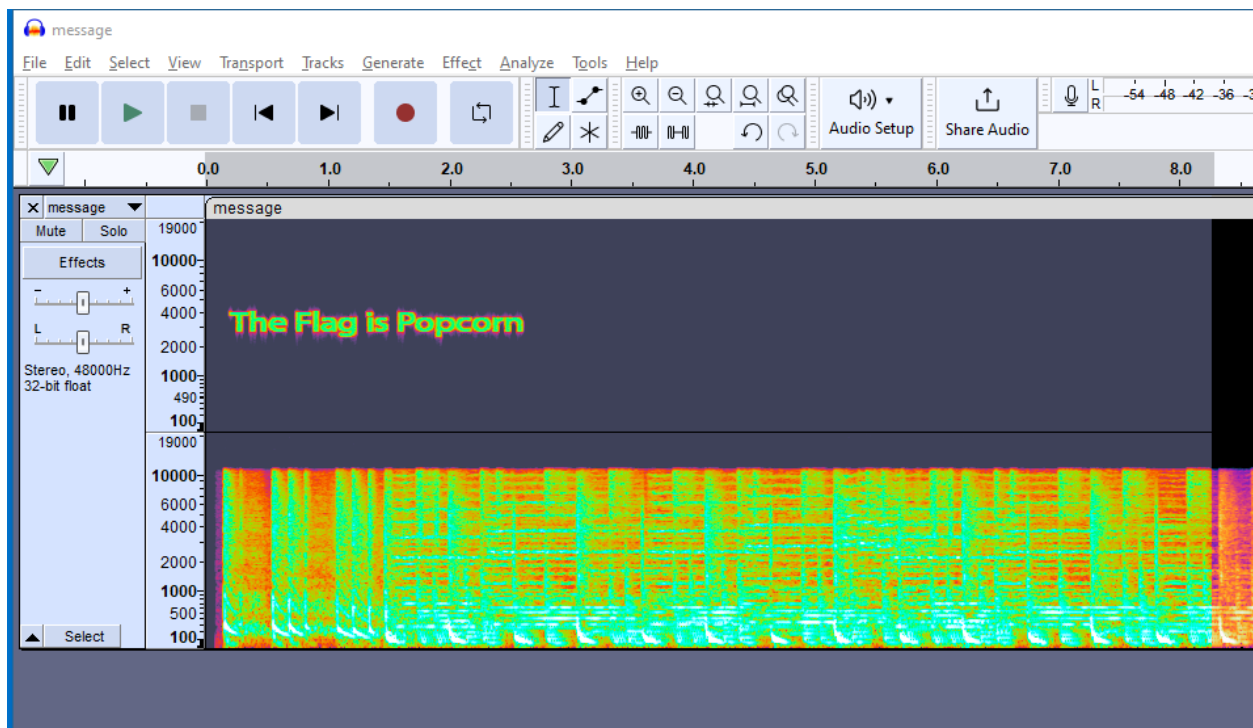

I really enjoyed the BlueMonkey 4n6 video on the last cipher questions. If you enjoy these challenges let us know!

A: The problem gives us a hint that a zero width (something) is used. At this point we can look to “Blue Monkey 4n6” for a lead. There is nothing to find with this lead. Using a zero-width decoder will reveal this: ***This\_!\$theFullFLAG***

## Sometimes I wish we could visualize music

Use message.wav

A: Open the file in Audacity. After doing so, switch to the spectral analyzer and then see the flag there. Enter ***“Popcorn”*** for the correct flag

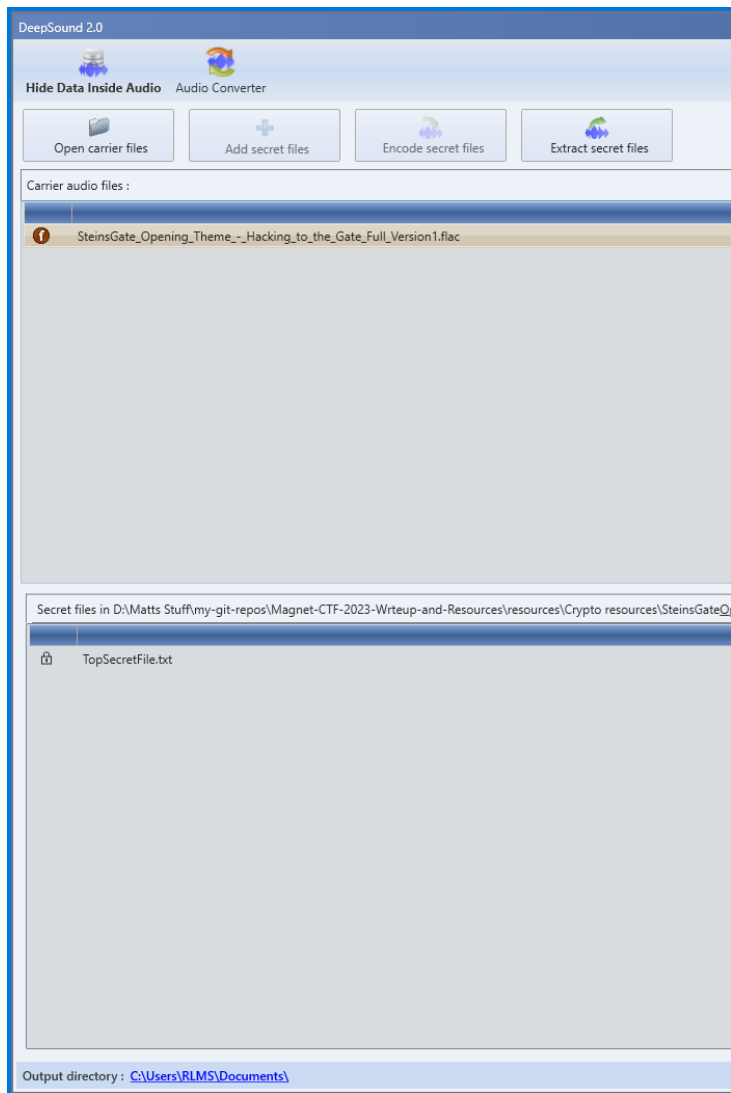

## wh1ter0se.m4v

*Use the file `SteinsGate_Opening_Theme_-_Hacking_to_the_Gate_Full_Version1.flac`*

*A: You won't know off the bat what to do, but when you do a bit of research you will find this site:*

*[https://mrrobot.fandom.com/wiki/Eps1.7\\_wh1ter0se.m4v](https://mrrobot.fandom.com/wiki/Eps1.7_wh1ter0se.m4v)*

*going down the page, you will find a line that talks about the software DeepSound. Download that software and open the file.*

*in DeepSound. Press the Extract button and it will write the following flag to a file*

File Edit Format View Help

WOW! You found another flag! Keep up the great work!

**WOW! You found another flag! Keep up the great work!**

## Cobalt Strike: A Necessary Evil?

[illegible]

xITFZNR3x3S0Z8YBEAMRd1Ww==

and then put that into cyberchef with the following parameters

The screenshot shows the CyberChef web application interface. The top section is titled 'From Base64' and includes a dropdown menu set to 'Alphabet' with the character set 'A-Za-z0-9+/=' selected. A checkbox labeled 'Remove non-alphabet chars' is checked. Below this is a checkbox for 'Strict mode' which is unchecked. The bottom section is titled 'XOR' and includes a 'Key' input field with the value '35' and a dropdown set to 'DECIMAL'. To the right, the 'Scheme' is set to 'Standard' and a checkbox for 'Null preserving' is unchecked.

You will receive this output:

The screenshot shows the 'Output' section of the CyberChef application. It contains a large block of garbled text, which is the result of the Base64 decoding and XOR operation. The text is a mix of various characters, including letters, numbers, and symbols, and is not readable as a meaningful message.

(Note: Use the following resource to see a better explanation of my method:

<https://michaelkoczvara.medium.com/cobalt-strike-powershell-payload-analysis-eecf74b3c2f7> )

## typing out all these questions...

**\*\*Question Name: \*\***

typing out all these questions is starting to hurt my Fingers, maybe I should Shift my thinking.

**\*\*Challenge: \*\***

yjododyjrg;sh

Look at your keyboard. Move all of the letters in the clue off by one. After doing that you will see that the flag is **thisistheflag**

# **ANDROID** (Unanswered: 8)

## **Process**

### **Tools used**

- Magne Axiom
- ALEAPP
- Autopsy

### **How I started:**

As soon as I received the image in my emails, I began processing it with Magnet Axiom Process. To do so, I opened Magnet Axiom Process and began a new case. This is the first screen you see, on startup.

Once you press the “New Case” button, you will be taken to a screen where you can enter the details of your case. This is the min detail of the Case Details screen. Write as much or as little as you need to to start. Press Next to continue,

PROCESSING DETAILS

SEARCH ARCHIVES AND MOBILE BACKUPS

Container files such as archives and mobile backups can be found within other evidence sources. Configure options on this page to search any containers found during your search.

SEARCH ARCHIVES AND MOBILE BACKUPS

ADD KEYWORDS TO SEARCH

Provide the keywords and regular expressions that you want to include in your search. If a keyword gets a hit during the search, it's added to a Keywords filter in AXIOM Examine.

ADD KEYWORDS TO SEARCH

PROCESS FILES USING OPTICAL CHARACTER RECOGNITION

During a scan, Magnet AXIOM can extract text from certain files using optical character recognition (OCR). AXIOM Examine displays the extracted text in its own card, called Text extracted using OCR.

PROCESS FILES USING OPTICAL CHARACTER RECOGNITION

DECODE FILE-BASED ENCRYPTION

Evidence sources can contain files that have been encrypted. Provide decryption keys so that AXIOM Process can decode the data for you.

DECODE FILE-BASED ENCRYPTION

CALCULATE HASHES AND FIND MATCHES

AXIOM Process can calculate hash values for each file in an evidence source. You can add hash sets from local .JSON or text files, or from a central Hash Sets Manager in your lab, so that AXIOM Process searches for files in the evidence with matching hash values.

CALCULATE HASHES AND FIND MATCHES

ANALYZE CHATS WITH MAGNET.AI

Enable chat categories so that Magnet.AI automatically categorizes chat conversations, based on the categories you select, and tags them in AXIOM Examine.

ANALYZE CHATS WITH MAGNET.AI

BACK

GO TO ARTIFACT DETAILS

Here you can tweak all properties for what the software will look for when it scans the image file system/

After clicking the Go to Analyze Evidence button, you will be taken to this screen.

**TAGS AND COMMENTS**

**IDENTIFIER MATCHES**

Magnet AXIOM can compare identifiers found in this case with identifiers from other cases that your organization has uploaded to the Magnet Prague database. These identifiers can include people identifiers, such as email addresses or phone numbers, and device identifiers, such as camera serial numbers or phone IMEI.

For more information and to download a beta copy of the Magnet Prague server software, visit Magnet Idea Lab.

<https://magnetideallab.com/> [COPY URL](#)

Once you have installed the Magnet Prague server software, configure product integration settings to connect Magnet AXIOM to Magnet Prague.

[CONFIGURE PRODUCT INTEGRATIONS](#)

**MAGNET.AI CATEGORIZATION**

**KEYWORD MATCHES**

**POTENTIAL CLOUD EVIDENCE LEADS (3)**

Magnet AXIOM discovered the following cloud accounts in the evidence. With AXIOM Cloud, you can attempt to access accounts using available credentials to acquire cloud evidence. Alternatively, you can try other methods such as public data acquisition, processing user-downloaded packages, or warrant returns.

Time zone UTC+000

On this screen you can start by going through any of the artifact categories. For instance, you can check the Media Files to view all of the media files on the device. This is what your screen might look like.

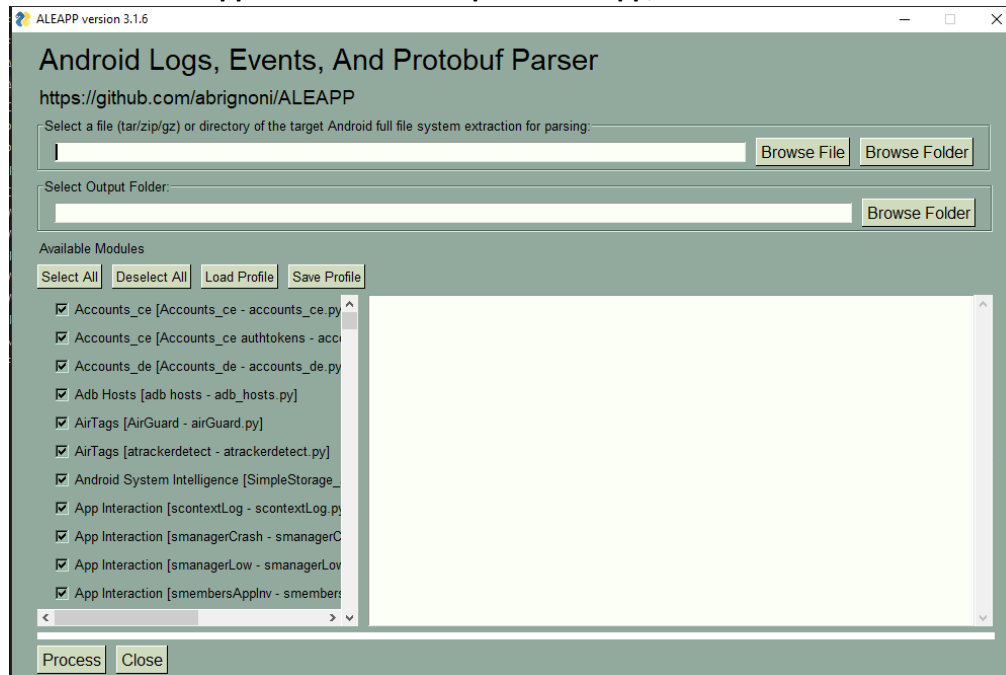

The screenshot displays the Magnet Axiom interface. On the left, a sidebar lists artifact categories with their counts: **MATCHING RESULTS** (42,797), **REFINED RESULTS** (496), **WEB RELATED** (2,927), **COMMUNICATION** (102), **SOCIAL NETWORKING** (318), **MEDIA** (28,640), **EMAIL & CALENDAR** (237), and **DOCUMENTS** (171). The **MEDIA** category is expanded, showing sub-categories like AMR Files, Audio, Carved Audio, Photoshop Files, Pictures (28,311), and Videos. The main area shows a table of **MATCHING RESULTS (28,311 of 28,311)**. The table has columns for Image, File, File..., Cre..., Last..., Last..., Size..., Skin..., Orig..., Orig..., Exif..., and Cre... The right sidebar shows details for artifact **1096**, titled **Google Pixel 3a XL Logical Image - Data.tar**. It includes a preview, details, artifact information (Size: 1096, Skin Tone Percentage: 0.0, Original Width: 41, Original Height: 41, Exif Extraction Status: Complete), evidence information (Source: Google Pixel 3a XL Logical Image - Data.tar\data, Recovery method: Carving, Evidence number: Google Pixel 3a XL Logical Image - Data.tar).

From this screen you can filter all of the artifacts the software found. Expand/contract any of the categories on the left to see more/less data from each category.

At this point, you have all of the basics you need to navigate Magnet Axiom. There are a few advanced techniques that I learned, but you can get by without them since most data is better found through the files or ALEAPP,

**Android Logs Events And Protobuf Parser (ALEAPP)**

To download AEAPP, I went to <https://github.com/abrignoni/ALEAPP/releases> and downloaded aleappGUI.exe. When I opened the app, I saw this screen

Now select your tar file and a folder to output the results to. Press Process. It will spit out a folder that looks like this

Opening it reveals this:

	_elements	2023-05-04 18:25	File folder

## Italian beast!

What animals killed the figure who was renowned for his strength?

**Wolves.** Find the answer in /data/media/0/DCIM/Camera. This is the image you are looking for

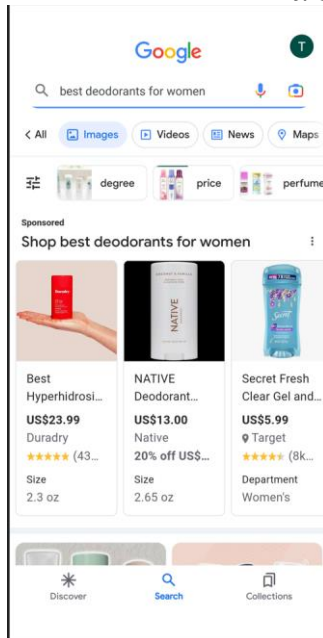

**You always forget something when traveling...**

This user seems to have been shopping for some sort of personal hygiene item, what was the price of the red item?

**\$23.99.** Find this evidence in the location

/data/dat/com.google.android.googlequicksearchbox/files/recently/tlouis@kurvalis.com-

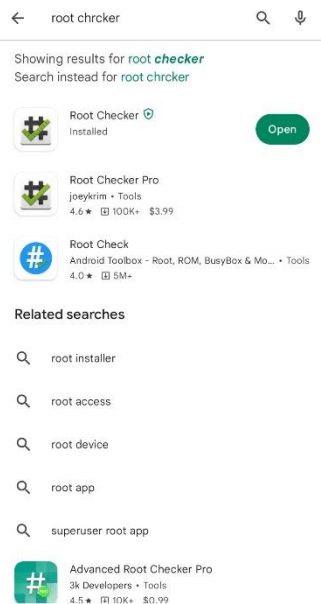

7133291355466100338.jpg

**Thr answrr is right infront of you!**

**This user installed an app on the phone relating checking privledges. What did the user specifically search for in the appstore when lookingnng for it?**

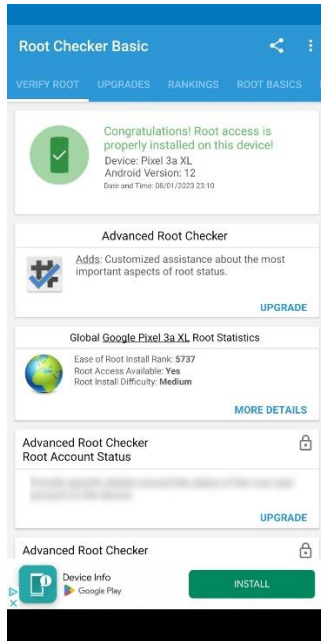

***root chrcker. See the image at /data/system\_ce/snapshots/121.jpg***

**Easy Peasy**

What was the "Ease of Root Install Rank" of this device?

5737. See this image from /data/system\_ce/snapshots/134.jpg

These new phones battery life can sure last a long time...

What was Tinas battery % when she entered the Copenhagen timezone?

83. Find this in the Turbo - Phone Battery report in ALEAPP. Modify the Show: filter to "All" and scroll down till you see 2022-12-04 18:03:57 on the time column. You will see that the column directly to the left of the time shows 83. That is our answer.

2022-12-04 12:07:55	84			Europe/Dublin
2022-12-04 18:03:57	83			Europe/Copenhagen
2022-12-04 18:07:17	82			Europe/Copenhagen
2022-12-05 01:37:55	81			Europe/Copenhagen
2022-12-05 04:37:55	80			Europe/Copenhagen

How low did we go?

It seems Tina did a lot of traveling. What was Tinas battery percentage when she left the Copenhagen timezone?

44. Keep scrolling down on the report from the result of the previous question. Look at the entry to the right of 2022-12-07 08:27:53. Find this answer to the right of that time.

2022-12-07 07:17:53	45			Europe/Copenhagen
2022-12-07 08:27:53	44			Europe/Copenhagen
2022-12-07 10:27:22	43			Europe/Dublin
2022-12-07 10:28:37	42			Europe/Dublin

One email isn't enough...

What email address is associated with this device that is NOT a gmail account?

I used Magnet Axiom Examine for this one. I looked at the protonmail contacts and found this one wilts1991@protonmail.com . Entering it was the correct answer

## Quite a lenient game!

It seems this user downloaded a game. How many hints were they allowed in the game?

75. This was a random guess. I did not know where to look for this one.

(Image courtesy of Stark4n6 [https://www.stark4n6.com/2023/05/magnet-user-summit-2023-ctf-android\\_5.html](https://www.stark4n6.com/2023/05/magnet-user-summit-2023-ctf-android_5.html))

data\data\com.asmolgam.flags\shared\_prefs\progress\_data.xml

Right at the top of the XML file we can see a key/value pair showing "hints" was **75**.

## A love story?

It seems that Tina had intentions of spawning some sort of office romance, as she searched for the legality behind it. What was the article called that gave her the answer to her question?

Can an Employer Prohibit Workplace Dating?. Find this in ALEAPP chrome Web History report.

2022-12-23 20:44:51	https://www.rocketlawyer.com/business-and-contracts/employers-and-hr/company-policies/legal-guide/can-an-employer-prohibit-workplace-dating#:~:text=Although%20employers%20may%20implement%20policies,coworker%20out%20on%20a%20date.	Can an Employer Prohibit Workplace Dating? - Rocket Lawyer	1	0	58

## UNSOLVED:

### CIPHER

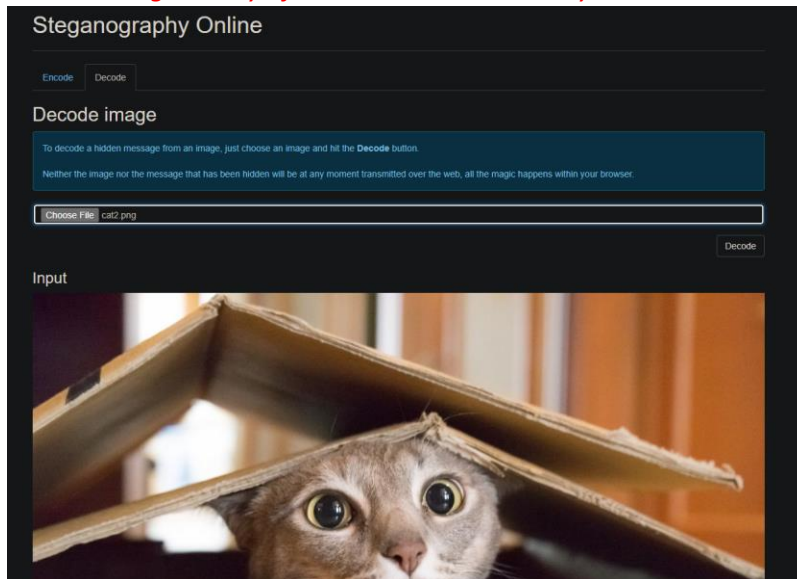

Found answers to this section from this video: <https://www.youtube.com/watch?v=KtdQyuhAZAs>

## people Online keep telling me my Style Suxx

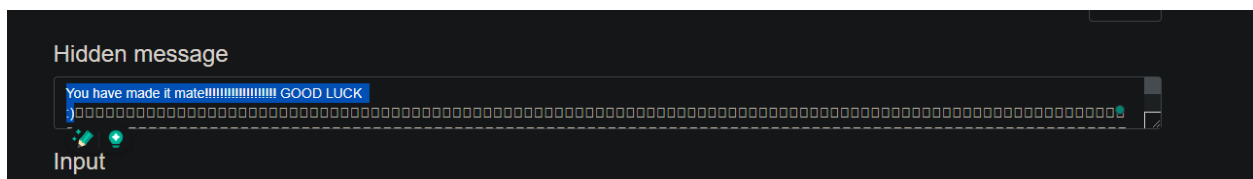

uses cat2.png

Pecial thanks to BlueMonkey 4n6 for the video!

**You have made it mate!!!!!!!!!!!!!!!!!! GOOD LUCK :)** For this one, look up "Style Suxx steganography online" and go to any of the tools that decode style suxx. This is an example.

After decoding, you will see the flag.

Why I didn't solve: I did not realize that style suxx was a thing and thus did not get the question

## Rapidly making my way through the Machete Order

IkImIHlvdSBvbmx5IGtuZXcgdGhIHbVd2VyIG9mIHRobZSBkYXJrIHNPZGUuliDigJQoVGhIEVtcGlyZSBTdHJpa2VzIEJhY2spCgo=

**"If you only knew the power of the dark side."** —(The Empire Strikes Back) Pluc the clue into a Base64 decoder. You will see that it spits out that.

Why I did not solve: I had that answer off the bat, but I overthought and tried cross-referencing quotes. I found nothing. When I tried entering the quote as is, It was not right.

## FORENSICS

## Resources Used

[https://www.stark4n6.com/2023/05/magnet-user-summit-2023-ctf-android\\_5.html](https://www.stark4n6.com/2023/05/magnet-user-summit-2023-ctf-android_5.html) - Android Writeup 2: Found most of the latter flags (see image on github repo)

<https://www.stark4n6.com/2023/05/magnet-user-summit-2023-ctf-android.html> - Android Writeup 1

## What is three's address?

What phone number sent the most android SMS messages?

(3/3 attempts used)

50333.

Why I didn't solve: I didn't realize I was making a mistake until I had wasted all of my tries. I was typing things from messages instead of this.

## Just a second

How many motion photos were taken with the device's own camera?

(3/3 Attempts used)

5

"If you filter for files within `data/media/0/DCIM/Camera` that have "MP" in the file name these should be motion photos. We can see 5 were on the device, the answer."

Name	Size	Type	Modified	Attr
..		Parent Folder		
PXL_20221204_180716698.MP.jpg	5.57 MB	JPEG image	12/4/2022 1:07 PM	-----
PXL_20221204_185819927.MP.jpg	9.32 MB	JPEG image	12/4/2022 1:58 PM	-----
PXL_20221205_202108202.MP.jpg	7.10 MB	JPEG image	12/5/2022 3:21 PM	-----
PXL_20221229_165715047.MP.jpg	5.36 MB	JPEG image	12/29/2022 11:57 AM	-----
PXL_20221229_165933558.MP.jpg	3.87 MB	JPEG image	12/29/2022 11:59 AM	-----

Why I did not solve: Parsed the clue incorrectly and did not look for the right information

## Would you like a free battery? Free of charge.

When was the FIRST time in UTC this phone shut down because it ran out of battery? (FORMAT YYYY-MM-DD HH:MM:SS based on 24 hour clock)

**We can see from the ALEAPP report that the first time the phone was shutdown because of battery drain was on "2023-01-03 12:11:26".**

## Shutdown Checkpoints report

***Why I did not solve: Simply had no idea where to find***

## Secret plans...

"It seems that Tina has been having conversations with someone she's working with. On 12/28/2022, it seems they made plans for a video call. When is this call in UTC? (FORMAT YYYY-MM-DD HH:MM:SS based on 24 hour clock)"

*Another unparsed artifact that AXIOM doesn't do but ALEAPP does to a certain extent. I found an error (incorrect path) which will be fixed in a future release but Google Chat is where we needed to look for this one.*

*data\data\com.google.android.apps.dynamite\databases\user\_accounts\tlouis@kurvalis.com\dynamite.db*

*There were conversations back and forth between Tina and Shawn. One message she states about having availability on "the 31st at noon EST".*

## Google Chat - Messages report

Total number of entries: 35

Google Chat - Messages located at: F:\\_FORENSICS\MUS2023\Evidence\ALEAPP\_Reports\_2023-05-

03\_Wednesday\_144747\temp\data\user\0\com.google.android.apps.dynamite\databases\user\_accounts\tlouis@kurvalis.com\dynamite.db

Show 15 entries

Message Timestamp (UTC)	Group Name	Sender	Message	Meeting Code	Meeting URL	Meeting Sender	Meeting Sender Profile Pic URL	Filename
2022-12-29 00:40:11	Shawn Garza	Tina Louis	Are you available on the 31st at noon EST so we end the year on a good note ;)					
2022-12-24 02:59:42	Shawn Garza	Shawn Garza	Uggh, love the PTO days. What day is good for you to catch up with video chat?					

**Given the timestamp of when the message was sent it can be assumed the date as December 31st. With it being noon in Eastern Standard Time we have to add 4 hours to make it UTC. So the answer was "2022-12-31 16:00:00".**

*Why I did not solve: Simply had no idea where to find*

## I am feeling thirsty...

**What popular destination spot did Tina visit on 12/04/2022?**

**Tivoli Gardens**

*Why I did not solve: Had no idea where to find. This image was my only lead, but it was not correct*

*Specifically, this part of it*

*If I just looked up famous Christmas markets and then found [visitdenmark.com](http://visitdenmark.com) I would have found this artifact*

Old mans geolocation

This user traveled to Denmark, and downloaded a few applications on the same day. Of these applications, only one has a UTM\_campaign parameter set in google searches relating to the application. What is the user's AppUserID for this application?

```

According to Stark4n6, this artifact is found in /data\data\com.fiverr.fiverr\shared\_prefs\appsflyer-data.xml

*Why I didn't solve: I didn't know where to find this. Given that Tina was in Denmark from 4Dec-7 Dec, I thought Fiverr and Twitter were possible matches, but I couldn't find a matching UID.*
